Art Unit: 1617

DETAILED ACTION

Applicant's amendments filed May 23, 2003 have been entered. The claims are now drawn to a method of modulating fertility or meiosis in a subject.

The cancellation of claims 22, 24, and 26-31 in amendments filed May 23, 2003 is acknowledged. The addition of claims 32-34 in amendments filed May 23, 2003 is acknowledged.

Claims 15-17, 23, 25, and 32-34 are pending.

Election/Restrictions

Claims 15-17, 23, 25, and 34 are generic to a plurality of disclosed patentably distinct species comprising a method of enhancing fertility and contraception. The instant claims are drawn to methods of modulating fertility or meiosis. Modulating is construed as "altering", e.g., either increasing or decreasing fertility. Examiner notes that the method of enhancing fertility and contraception are patentably distinct species. It is well known in medical field that both methods belong to separate and distinct fields of practice. Therefore, the fields of search for both methods will be diverse. Searching for all the method of altering fertility would present an undue burden to the Office. Moreover, the small molecules that can modulate fertility or meiosis are seen to be patentably distinct since one of ordinary skill in the art would reasonably expect that one compound cannot function as both enhancing fertility and contraception at the same time. Therefore, herein claimed "small molecules" that modulate fertility or meiosis are seen to be generic that encompass all known small organic compounds. They are

Art Unit: 1617

classified into classes 514, 532, 534, 536, 540, 544, 546, 548, 549, 552, 544, 546, 548, 560, 562, 564, 568, and 570. In each class, there are at least 100 to 200 subclasses. Altogether there are more than 1000 subclasses. The field of search is enormously diverse. Therefore, searching for all the compounds encompassed by the claims present an undue burden to the Office. Applicant is required under 35 U.S.C. 121 to elect i) a single disclosed species of a method of modulating fertility and meiosis (e.g., either enhancing fertility or contraception) <u>and</u> ii) a single disclosed compound of modulating fertility and meiosis, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Claims 32-33 are drawn to the specie of method of contraception. These two claims will be examined along with other claims if the specie of contraceptive method is elected.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Art Unit: 1617

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to San-ming. Hui whose telephone number is (703) 305-1002. The examiner can normally be reached on Mon 9:00 to 1:00, Tu - Fri from 9:00 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan, PhD., can be reached on (703) 305-1877. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4556 for regular communications and (703) 308-4556 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
